FIG. 5 is a perspective view of a mechanical assembly. The assembly includes a main body (102) with a front panel (102a) featuring a grid-like structure. A lid (103) is hinged to the main body, with the hinge mechanism (103a) visible. The lid has a top surface (103b) and a front edge (103c). A handle (104) is attached to the lid. The main body has a side panel (103d) and a bottom panel (103e). A vertical support structure (51) is attached to the top of the main body. A horizontal support structure (50) is attached to the side of the main body. A small rectangular component (105) is shown near the bottom of the main body. A circular component (106) is shown near the top of the main body. A rectangular component (107) is shown near the side of the main body. A rectangular component (108) is shown near the top of the main body. A rectangular component (109) is shown near the top of the main body. A rectangular component (110) is shown near the top of the main body.
